

Stradcom enhances accounting system to meet demands of growing business

True to its vision to become the premier Philippine information and communications technology company, focused on providing consulting and transaction-based services to both the public and private sectors, Stradcom Corporation (Stradcom) is working to ensure that it has the right tools that will enable them to deliver on these business goals.

Stradcom recently signed an agreement with Gurango Software Corporation (GSC), a Microsoft Gold Certified Partner for Business Solutions, which involves the acquisition of Microsoft Dynamics GP. This new financial system will provide Stradcom with the tools that will enable the company to automate the logistics department and improve the existing automated accounting system.

Stradcom is one of the leading private sector proponents in the Philippines for Government Information Technology (IT) projects under the Build-Operate-Transfer (BOT) Law. The company is the main proponent contractually obligated to undertake the Land Transportation Organization (LTO) IT Project. The LTO IT Project covers the development of an integrated IT system of critical LTO business processes, interconnecting about 200 LTO sites nationwide.

“Our core competencies are linking public and private organizational systems and delivering public services through IT. Our services are highly mission-critical and we need a system that will deliver on the demands of our business, and this is where Microsoft Dynamics GP comes in,” said Cezar T. Quiambao, President & CEO of Stradcom.

Microsoft Dynamics is a line of integrated, adaptable business management solutions that enables individuals and organizations to make business decisions with greater confidence. It works like familiar Microsoft software such as Microsoft Office, which means less of a learning curve, so users will be able to get the system up and running quickly. Microsoft Dynamics is built to work easily with existing systems a company has already implemented.

“Microsoft Dynamics will help Stradcom respond rapidly to the changing demands of their business. It will provide them with more complete insights across the organization, allowing the company to make timely and informed decisions with much confidence.

Quiambao, President and CEO both from Stradcom Corporation, Joey Gurango , CEO, Gurango Software Corporation and Oscar A. Cabading, Director, Stradcom.

Microsoft is committed to providing solutions for organizations such as Stradcom, that is working to trail blaze information technology integration in the public sector,” stated Lyn Reyes, Partner Engagement Manager, Microsoft Philippines.

According to Joey Gurango , CEO of Gurango Software Corporation, “Microsoft Dynamics GP has a very strong fixed asset module and it will enable Stardcom to manage all the assets it owns, easier and in a more seamless manner. Its high scalability will allow Stradcom to customize their financial system depending on the needs of their growing company. GSC has seasoned professionals who will be able to provide technical and training support for Microsoft Dynamics GP as it goes live in Stradcom.”

The main value of the Microsoft Dynamics solution is its integration capability to automate the existing manual process being done at Stradcom.

With the new system, capturing of needed information will improve employee decision-making. “GP will help us generate daily, weekly, monthly and period covered regular reports to the top management – this will equip them in setting company goals and deciding on the next steps to achieve our company goals,” Quiambao stated.

Quiambao added that “this improved system will benefit not only our company and the way our employees work, but more importantly, the way we deliver our services to our main stakeholders – the public sector. Improved services would mean an improved way of living for the public sector.”

With the new system in place, once it is fully deployed, generating reports could be done in a shorter period of time and employee efficiency and productivity will surely increase.
